

The importance of good underlay

Good underlay will...

- Improve underfoot comfort
- Maintain appearance, reducing flattening
- Absorb the pressure of foot traffic and reduce wear
- Improve thermal insulation and warmth
- Increase sound insulation
- Smooth out sub-floor imperfections
- Last the lifetime of the carpet

Poor or old underlay will...

- Feel hard and unwelcoming
- Reduce carpet life
- Cause wrinkling and premature wear spots
- Cause carpet fibres to break down more quickly
- Not meet British standards
