

CLEANING & MAINTENANCE OF SILK BLEND CARPETS

YOUR GUIDE TO A SIMPLE
MAINTENANCE PROGRAMME

SANDRINGHAM
C A R P E T S

A simple maintenance programme will keep your silk blend carpet looking good.

CARE AND MAINTENANCE OF A SILK BLEND CARPET

Silk is a natural protein fibre commonly derived from the cocoons of the larvae of moth caterpillars. It has a smooth, soft texture and a shiny appearance, but is incredibly delicate, and needs to be handled with great care.

To maintain the appearance of your silk blend carpet it is important to ensure it isn't used in a high traffic flow area, or where there is a risk of staining through unfortunate spills.

An option to treat a silk blend carpet as soon as it is laid with a special stain resistant solution, is offered by some good quality, professional cleaning companies.

VACUUMING

Vacuum regularly without using the beater attachment; use the suction devices.

A silk blend rug can be taken outside and shaken before vacuuming.

SPOT CLEANING SPILLAGES

It is highly recommended to seek a professional cleaning company with experience of silk blends.
