

# CLEANING & MAINTENANCE OF VISCOSE CARPET

YOUR GUIDE TO A SIMPLE  
MAINTENANCE PROGRAMME

  
**SANDRINGHAM**  
CARPETS

A simple maintenance programme will keep your viscose carpet looking good.

---

## CARE AND MAINTENANCE OF 100 % VISCOSE CARPET

Viscose is a natural fibre derived from wood pulp, and contains cellulose. Although viscose has the shiny appearance of silk, it is not as durable and the cellulose fibre easily breaks down in the presence of water.

To maintain the appearance of your viscose carpet it is important to ensure it isn't used in a high traffic flow area, or where there is a risk of staining through unfortunate spills.

An option to treat a viscose carpet as soon as it is laid with a special stain resistant solution, is offered by some good quality professional cleaning companies.

## VACUUMING

Vacuum regularly without using the beater attachment; use the suction devices.

A viscose rug can be taken outside and shaken before vacuuming.

## SPOT CLEANING SPILLAGES

It is highly recommended to seek a professional cleaning company with experience of viscose.
